ANDO, T. (See KONISHI, S.)

BALL, F. G., BRITTON, T. and LYNE, O. D. Stochastic multitype epidemics in a community of households: Estimation of threshold parameter R_* and secure vaccination coverage 345

BECKER, N. G. and BRITTON, T. Estimating vaccine efficacy from small outbreaks 363

BRITTON, T. (See BALL, F. G.)

BRITTON, T. (See BECKER, N. G.)

CAI, J. (See KONG, L.)

CAI, J. (See SCHAUBEL, D. E.)

CAI, J. (See YIN, G.)

CAI, T. and CHENG, S. Semiparametric regression analysis for doubly censored data 277

CARROLL, R. J. (See HU, Z.)

CARROLL, R. J. (See LIN, X.)

CHAN, K. S. and TONG, H. Testing for multimodality with dependent data . . 113

CHEN, M.-H., DEY, D. K. and IBRAHIM, J. G. Bayesian criterion based model assessment for categorical data 45

CHENG, S. (See CAI, T.)

CHOUANIÈRE, D. (See GRZEBYK, M.)

CHOUDHURI, N., GHOSAL, S. and ROY, A. Contiguity of the Whittle measure for a Gaussian time series 211

COX, D. R. and REID, N. A note on pseudolikelihood constructed from marginal densities 729

CRAIU, R. V. and DUCHESNE, T. Inference based on the EM algorithm for the competing risks model with masked causes of failure 543

CRAWFORD, J. R. (See GARTHWAITE, P. H.)

CRITCHLEY, F. and MARRIOTT, P. Data-informed influence analysis 125

DAI, M. and GUO, W. Multivariate spectral analysis using Cholesky decomposition 629

DAVISON, A. C. (See SEMADENI, C.)

DETTE, H. and KWIECIEN, R. A comparison of sequential and non-sequential designs for discrimination between nested regression models 165

DEVILLE, J.-C. and TILLÉ, Y. Efficient balanced sampling: The cube method . 893

DEY, D. K. (See CHEN, M.-H.)

DI MARZIO, M. and TAYLOR, C. C. Boosting kernel density estimates: A bias reduction technique? 226

DRTON, M. and PERLMAN, M. D. Model selection for Gaussian concentration graphs 591

DRTON, M. and RICHARDSON, T. S. Multimodality of the likelihood in the bivariate seemingly unrelated regressions model 383

DUCHESNE, T. (See CRAIU, R. V.)

EGUCHI, S. (See HENMI, M.)
FAN, J. and YIM, T. H. A crossvalidation method for estimating conditional densities 819
FAN, J. and ZHANG, W. Generalised likelihood ratio tests for spectral density . 195
FAN, Y. (See HALL, P.)
FAVRE, A.-C. (See TILLÉ, Y.)
FÉLIX-MEDINA, M. H. and THOMPSON, S. K. Adaptive cluster double sampling 877
FINE, J. P., YAN, J. and KOSOROK, M. R. Temporal process regression . . 683
FIRTH, D. and MENEZES, R. X. DE. Quasi-variances 65
FUH, C.-D. and HU, I. Efficient importance sampling for events of moderate deviations with applications 471
FULLER, W. (See KIM, J. K.)
GANGNON, R. E. and KOSOROK, M. R. Sample-size formula for clustered survival data using weighted log-rank statistics 263
GARTHWAITE, P. H. and CRAWFORD, J. R. The distribution of the difference between two *t*-variates 987
GHOSAL, S. (See CHOUDHURI, N.)
GHOSH, M. and MAITI, T. Small-area estimation based on natural exponential family quadratic variance function models and survey weights . . . 95
GOLDSTEIN, M. and SHAW, S. C. Bayes linear kinematics and Bayes linear Bayes graphical models 425
GOLDWASSER, M. A., TIAN, L. and WEI, L. J. Statistical inference for infinite-dimensional parameters via asymptotically pivotal estimating functions . 81
GOWER, J. C. The geometry of biplot scaling 705
GRZEBYK, M., WILD, P. and CHOUANIÈRE, D. On identification of multi-factor models with correlated residuals 141
GUAN, Z. A semiparametric changepoint model 849
GUO. W. (See DAI, M.)
HALL, P., HYNDMAN, R. J. and FAN, Y. Nonparametric confidence intervals for receiver operating characteristic curves 743
HENMI, M. and EGUCHI, S. A paradox concerning nuisance parameters and projected estimating functions 929
HINKLEY, D. V. (See SEMADENI, C.)
HU, I. (See FUH, C.-D.)
HU, Z., WANG, N. and CARROLL, R. J. Profile-kernel versus backfitting in the partially linear models for longitudinal/clustered data 251
HYNDMAN, R. J. (See HALL, P.)
IBRAHIM, J. G. (See CHEN, M.-H.)
IMOTO, S. (See KONISHI, S.)
JEWELL, N. P. and VAN DER LAAN, M. Case-control current status data . . 529
JONES, M. C. and LARSEN, P. V. Multivariate distributions with support above the diagonal 975
JOSEPH, V. R. Efficient Robbins–Monro procedure for binary data . . . 461
KELDERMAN, H. Measurement exchangeability and normal one-factor models . 738
KELLERER, A. M. (See PIERCE, D. A.)
KIM, D. (See KIM, T. Y.)
KIM, J. K. and FULLER, W. Fractional hot deck imputation 559

KIM, T. Y., KIM, D., PARK, B. U. and SIMPSON, D. G. Nonparametric detection of correlated errors 491
KIM, Y. (See PARK, E.)
KONG, L., CAI, J. and SEN, P. K. Weighted estimating equations for semiparametric transformation models with censored data from a case-cohort design . . 305
KONISHI, S., ANDO, T. and IMOTO, S. Bayesian information criteria and smoothing parameter selection in radial basis function networks 27
KOSOROK, M. R. (See FINE, J. P.)
KOSOROK, M. R. (See GANGNON, R. E.)
KOWALSKI, J. and POWELL, J. Nonparametric inference for stochastic linear hypotheses: Application to high-dimensional data 393
KUK, A. Y. C. Permutation invariance of alternating logistic regression for multivariate binary data 758
KWIECIEN, R. (See DETTE, H.)
LAI, T. L. and SHIH, M.-C. Power, sample size and adaptation considerations in the design of group sequential clinical trials 507
LARSEN, P. V. (See JONES, M. C.)
LEE, J. and LUND, R. Revisiting simple linear regression with autocorrelated errors 240
LIECHTY, J. C., LIECHTY, M. W. and MÜLLER, P. Bayesian correlation estimation 1
LIECHTY, M. W. (See LIECHTY, J. C.)
